Description	<p>Pharmaceutical sales representatives (formerly detailmen) are salespeople employed by pharmaceutical companies to persuade doctors to prescribe their drugs to patients. Drug companies in the United States spend ~\$5 billion annually sending representatives to doctors, to provide product information, answer questions on product use, and deliver product samples. These interactions are governed according to limits established by the Code on Interactions with Health Care Professionals, created by the Pharmaceutical Research and Manufacturers of America (PhRMA). This code came into practice in 2002 and has since been updated to help define ethical interactions between health care professionals and the pharmaceutical companies. The lecture started around 9:30 am and ended around 4:00 PM. The lecture was received with admiration by the students and they also found the slides appropriate. The event ended with honorarium to the guests and vote of thanks.</p>

Description	<p>The growth in advancement and up-gradation of technology in machinery has led to manufacture all kinds of Pharmaceutical Machinery in India. As low technology offerings have been faster in the initial stage, the Indian machinery today is considered as one of the value-added engineering's with the integration of new technologies. More than 350 facilities in India's pharmaceutical-machine manufacturing industry are present. The Indian pharmaceutical machinery industry is currently catering to the segments of tableting and capsulation, powder processing, material handling, R&amp;D equipment and instrumentation, coating, bulk drug plant installation etc. The SME sector facilitates around 800 pharmaceutical machine manufacturing and allied utility service units. Majority of these units undertake the supply of custom-made machineries using the location advantage of buyers and job works. The lecture started around 9:30 am and ended around 4:00 PM.
