Description	<p>Save Soil is a global movement launched by Indian spiritual leader Sadhguru to address land degradation and advocate for healthy soil. The initiative was presented on 5th April at the United Nations in Geneva by the Isha Foundation and supported by the WHO, UN SDG lab, and IUCN.</p> <p>The VAGDEVI Foundation, an IUCN Member, launched the 'Journey to Save Soil' in PCOP on 21st March, setting its founder Sadhguru off on a 100-day motorcycle journey through 26 countries to raise awareness about soil degradation and advocate for bringing organic matter back to agricultural processes.</p> <p>Soil degradation is the physical, chemical and biological decline of soil quality. Caused by unabated deforestation and urbanisation, industrial pollution, overgrazing, and unsustainable agricultural practices, half of the world's soil is already degraded. This loss threatens food quality and supply, water security and biodiversity, increases carbon emissions and climate related risks, and can lead to loss of livelihoods, conflict and migration. A change in farming practices has never been more urgent.</p> <p>As a part of this campaign Princeton college of pharmacy for students and staff also participated in the movement and Sadhguru's visit to Hyderabad and planted few saplings at Shamshabad area.</p>

Description	<p>Most plastics we use today continue to be made from fossil fuels in a process that contributes to increased greenhouse gas emissions from their production, their use, through to their disposal. Recycling rates also remain low and plastics continue to pose a threat to our environment, through littering, improper waste management, and the wear and tear of products contributing to micro plastic contamination in the environment. Plastics, including their chemical additives, can stay in nature for many years and potentially enter the food chain. In the wake of growing public demand, a number of manufacturers have introduced plastics that are considered bio-based, compostable or biodegradable. However, the market share for these types of plastics is only about 1 %.</p> <p>Biodegradable and compostable plastics are supposed to reduce the pollution problem posed by plastics, however, they still need to be correctly disposed of, an important point often not well understood by consumers, the EEA briefing says. For example, biodegradable and compostable materials can be broken down by microorganisms into water, carbon dioxide, mineral salts and new biomass within a defined period of time.</p> <p>In this awareness campaign PCOP students and staff visited one of the village Chowdaryguda and created awareness about the bags and how these bags are safe to environment and threats posed by using plastic bags.</p>

Description	<p>Princeton college of pharmacy celebrated "WORLD NATURE CONSERVATION DAY" on July 28, 2020. All of the staff and students had planted the plants at their homes on this occasion.</p> <p>On this occasion, our chairman, Dr. S PRABHAKAR RAO, took the initiative and planted a sapling, He delivered a speech in which he encouraged everyone to plant at least one tree each year in order to create a pollution-free society. The majority of the faculty illustrated their interest by planting trees in their immediate surroundings.</p>

Description	The dangers that plastics pose are numerous. The becomes littered with plastic bag garbage, presenting an unsightly and poor sanitary conditions sight. As a result of the "throw-away culture," these bags end up in the city. On September 9th, 2019, the PCOP held an awareness rally from campus to signal titled "Say no to plastic." The principal, vice-principal, staff, and students all took part and explained the effects of plastic on current and future generations. Congratulations to NSS Coordinator Mr. K.HARIPRASAD and the team for organizing this event. and we hope to see more in the future.

Description	<p>Let's stop arguing over who we think created the Earth and join forces to resist those who want to do it harm." With the help of the Dhruvansh Organization, the PCOP NSS team, led by Mr. HARIPRASAD, faculty, and students, launched a massive mission to clean the Ghatkesar Lake in ghatkesar on September 18. Therefore, the objective attempts to remove waste materials such lily pads, creepers, scum, water plants, and other weeds from the water body. We are grateful for the efforts made by the entire team to clean the lake. With participation certificates, the management has shown its appreciation for the work of the faculty and employees.</p>
